

# **Final Assignment**

Following is the final assignment for the Dreamweaver II workshop. You can build a new site or you can continue working on a site that you started in Dreamweaver I. Keep in mind, however, if you continue working with a previous site, you WILL have to revise your current pages to reflect the DWII outcomes.

- **Total of 8 pages**
- Required Pages
  - Entrance page (for examples, see <http://ismsandsuch.com>, <http://www.bensondrews.com>, <http://www.wsu.edu/~mdrews>)
  - One page must be a Site Map, which outlines the contents of your site. In this page, you will also need to include a narrative about how you've demonstrated the DWII skills (i.e. where did you use rollover images? Image mapping? How did you show consistency throughout your various pages)
  - External Links or Resources Page
- You must also demonstrate the following elements
  - Consistent thematic elements
  - Consistent and deliberate use of Alignment, Contrast, Repetition, and Proximity
  - Header/logo
  - Toolbar
  - Rollovers
  - Image mapping
  - Link to .pdf file, movie, or Powerpoint file

## **RULES:**

No prefab style sheets – you must use your own design to pass DWII
