

Final Cut: Assignments

Session 1

I have provided some captured video clips for editing. You are required to create a short film for this week's assignment. Complete the following tasks with these video clips.

1. Create a 1-minute movie using the stock video clips.
2. Add at least 3 video transitions.
3. Add a text page and video generator.
4. Add at least 2 video filters.
5. Add at least two audio effects — this includes filters, transitions, music, and voiceovers.
6. Render the movie.

♥Turn it into the Drop Box by 5:00, Friday (10/27).

♥Turn in a storyboard of the film you are going to make for Session 2.

Session 2

We'll film for part of the class and have you practice using the digital camera and tripod. When we return, we'll import what you've shot and practice cutting the film.

Homework

1. Shoot film for the video project you are going to create.

Session 3

You can make a documentary, an art film, a commercial, or anything else for this class—even a project for another class. The only stipulations are that your video ***must be at least 3 minutes long*** and include

1. At least 3 video transitions.
2. A title page
3. At least 2 video filters.
4. At least two audio effects.
5. A credits page.
6. A voiceover.
7. Music.

The finished movie must be burned to a CD and turned in by Friday (11/10) at 5:00.
