

GarageBand Assignments

Assignment 1:

1. Make a 20 second drumbeat that uses the bass, snare, and cymbal from a different drum kit (try something besides the rock kit).
2. Add one other instrument of your choice to the beat.
3. Save your song as your name and the assignment number (janedoe1, for example)
4. Export your song to iTunes

Assignment 2:

Show us you can use loops in GarageBand by creating a song that meets the following requirements:

1. Song is at least 40 seconds long
2. Song has at least three tracks
3. Song uses at least three different instruments, at least one of which may NOT be a loop
4. Song has one customized loop
5. Song has one bridge or transition
6. Save your song as your name and the assignment number (janedoe2, for example)
7. Song is exported to iTunes

Assignment 3:

Show us you can create a podcast that fulfills the following requirements:

1. Runs 3 minutes or longer
2. Includes your recorded voice
3. Uses at least 2 of the special radio sound effects
4. Has a discernible purpose/some reason for communicating with others. This can be a radio show, an informative talk about a subject (kind of like a mini-lecture), or a spoken letter to friends and family about recent events in your life.
5. Includes at least 3 photos (of anything you want as long as it suits the purpose of your podcast)
6. Includes one of the songs you created for the earlier assignments.
7. Save your song as your name and the assignment number (janedoe3, for example)
